

priority determining means for determining whether or not each one of the at least one set of electronic mail data has a high priority based on a corresponding electronic mail title; and

image forming means for forming an image based on electronic mail data selected by the data selecting means, wherein the internet facsimile device displays the received electronic mail title, and wherein the image forming means forms an image based on the electronic mail data which has been determined to have a high priority, whereby the internet facsimile device prints the image formed by the image forming means.

5.6 F1
F2
18. (Amended) The internet facsimile device according to claim 14, further comprising notifying means for notifying a user when the image forming means forms an image based on the electronic mail data which has been determined to have a high priority.

5.6 F1
21. (Three Times Amended) A method of controlling an internet facsimile device of a receiving party, comprising the steps of:

receiving electronic mail attached with a header by the internet facsimile device from a remote internet facsimile device, the header including a title;

reading the title from the header;

displaying the title that has been received along with the electronic mail data;

5.6 F3
determining whether or not the electronic mail has a high priority based on a corresponding electronic mail title; and

forming an image based on the electronic mail which has been determined to have a high priority, wherein the internet facsimile device displays the received electronic mail title and prints the image formed based on the electronic mail which has been determined to have a high priority.
